

FLUORESCENT FLUSH MOUNT FIXTURE ASSEMBLY & INSTALLATION INSTRUCTIONS MODEL#31006-113

Please read carefully and save these instructions, as you may need them at a later date.

CAUTION

Turn off the main power at the circuit breaker before installing the fixture, in order to prevent possible shock.

GENERAL

All electrical connections must be in accordance with local and national electrical code (N.E.C) standards. If you are unfamiliar with proper electrical wiring connections obtain the services of a qualified electrician.

Remove the fixture and the mounting package from the box and make sure that no parts are missing by referencing the illustrations on the installation instruction.

ASSEMBLY AND INSTALLATION

1. Turn off main power at the circuit breaker.
2. Thread the hex nut (11) onto the nipple (12), and screw the nipple (12) through the mounting bracket (3) into the coupling on the fixture pan (14) a minimum of four turns. Secure the mounting bracket (3) to the outlet box (1) using the mounting screws (4).
3. Use the wire connectors (2) to connect the wire: Connect the white supply wire (5) to the white fixture wire (9), connect the black supply wire (6) to the black fixture wire (10). Connect the house ground wire (7) to the fixture ground wire (8) with the green screw (13). Carefully tuck all the wires back into the outlet box (1). All installation pls according to Clause 73.7 (d) of UL Standard 507. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box and the ungrounded conductor on the other side of the outlet box.
4. Put the fixture pan (14) through the nipple (12) on the mounting bracket (3) and secure it using the nut (15).
5. Take out the GU24 bulb (18) and install it to the lamp socket (17).
6. Secure the glass shade (19) with the three side screws (16).

INSTALLATION IS NOW COMPLETED
